Products & Services

Easily Integrated, Durable and Reliable.

926™ Knife 928™ Stacker

For use with the Monarch 9855 Tabletop Bar Code Printers, the Monarch 926 Knife

handles low to mid-volume tag cutting of up to 10 mil tags at up to 6 ips. This knife is capable of cutting approximately 1 million tags before a replacement knife is needed.

The Monarch 928 Stacker stacks up to 6 ips with a maximum tag length of 3.66 inches. The Monarch 928 Stacker only works with the Monarch 926 Knife. It cannot be used with the Monarch 938 Verifier.

932™ Stacker

The Monarch 932 Stacker is used exclusively with the Monarch 9860 Tabletop Ticketing System for a complete compliance tag printing solution. It stacks up to 8 ips for

high productivity and has a 2,000 tag capacity for fewer “stops” due to “stacker full” condition. Double high batch separators help you keep batches straight.

935™ Rewinder

This rewinder is designed to take-up entire rolls of labels on 1”, 3” or 4” cores. It can also take up 1,200 linear inches using the coreless operation.

The 935 Rewinder accommodates supply widths up to 4.125”. With its small footprint you have a fast, flexible, easy-to-use solution. **Designed for use with any tabletop printer.**

938™ Verifier

Monarch’s 938 Verifier gives you peace-of-mind performance with the ability to back feed and overprint bad tags or labels to ensure unscannable tags and labels will **NOT** be used. Tags and labels can be verified at the top printer speed, so productivity is high.

The 938 Verifier is an option for the Monarch 9855 Tabletop printer and the Monarch 9860

939™ Keyboard

This keyboard makes off-line data entry a breeze! Designed for the retail supply chain customers’ need to enter both alpha and numeric data, the 939 Keyboard features a full QWERTY layout with

separate calculator numeric keys. The keyboard also features a 2-line x 40-character backlit display for easy prompting and data entry. **The 939 Keyboard comes standard with the Monarch 9860 Tabletop Ticketing System and as an option for the Monarch 9855 Tabletop printer.**

The 939I Intelligent Keyboard is also available. Use it for data collection and data manipulation as well as data entry!
