

b8100 is one of series of LCD touch screen all-in-one machines 。 With plastic steel ,flexible configuration and optional host computer by customer , it can provide customers with customized space , b8100 is capable to easily realize various information query functions in different industries, including geographic location, users' information, related laws and regulation, and operation flow 。

Technical Specification

Touch display system

Display : 15/17 inch LCD color liquid display module

Touch screen : 15/17 inch

- ① explosion proof surface acoustic wave (dust proof 、 water proof 、 free maintenance) ；
- ② infrared (dust proof 、 water proof 、 free maintenance , optional) 。

Multimedia system

Power : 2 x 2W

Frequency response : 20Hz~20KHz

Dimension

Enclosure : 1350mm(height) x 470 mm(width) x 400 mm(thickness)

Host : 400mm(height) x 400 mm(width) x 200 mm(thickness)

It is to be noted that all configurations are subject to change without notice
